

JOHN W. NYSTROM,
Engineer,
No. 1010 Spruce Street,

Philadelphia, Sept. 3 1881

George C. Mahon Esq.

Dear Sir

Your favor of Aug. 24 came to hand this morning, having probably laid at the Franklin Institute for many days. If you write again please direct the letter to my proper address and I will get it promptly.

I am well acquainted with the country and people in the part of Peru you intend to move to. In the present state of that country I do not like to give advice as to the probability of your success in the future. I do not know of any work

upon which you could
rely for your enterprise.

I am now in correspondence
with Col. Berns on the subject
of his scheme in that country.

I am the author of the
Parabolic Construction of
ships which you enquired
about.

Very Respectfully
John W. Nyström.

Torontoy, 110
